

# Consolis ADS X-10

High functionality touch screen cash register. Integrated with a countertop credit card machine for fast accurate transactions.

### One time transaction entry

No need to key into two devices, means faster customer service and less queues.

### Error reduction

Single transaction entry cuts out errors, saving you money.

### Easy reconciliation

No need to waste time comparing till rolls - it's all reconciled on the Consolis ADSX-10

# A modern approach to taking in-store payments.

The Consolis ADSX-10 is a brand new ARM processor based all in one electronic point of sale system.

The ADSX-10's all new point of sale software platform has been built with the merchant in mind, using the combined 100+ years of experience found at Consolis and has been designed to be the perfect replacement for a traditional cash register in retail or hospitality applications.

## Form and Functionality

### The ADSX-10 Combination Package consists of:

- ADSX-10 touch screen cash register
- Cash drawer
- Colour screen contactless enabled countertop payment terminal
- Competitive merchant service rates
- Optional scanner

## Installation, Functionality, Support

Once you have decided you want to save time and money using the ADSX-10 integrated payment solution, we will guide you through the set up process.

We need to complete the necessary paperwork for your rental agreement and merchant services application which normally takes around 7 days to process.

Once complete we will configure your system for retail or hospitality, set it up, test it and despatch to you by next day courier.

We will then guide you through set up and have you up and running in minutes and support you as required thereafter.

## Pricing Options

The ADSX-10 Combination Package is priced on a bundled rental basis to include your Consolis ADSX-10 and your Ingenico payment terminal meaning one contract for all your payment devices. Renting means no need for capital expenditure and includes our dedicated support throughout your contract. One easy monthly payment will cover your entire integrated EPOS and payment solution.

**The ADSX-10 Package will cover its own costs each month when you consider the benefits of an integrated till and payment device.**

**Many UK retailers are wasting time, money and missing potential sales by not using an integrated system like the Consolis ADSX-10**

*The ADSX-10, linked to our new card machine, has made a massive improvement in the way we serve our customers and manage our business."*

## Reliable transactions

Consolis Payments has partnered with **Anchor Data Systems** and **Streamline**, the UK's No 1 card payment provider. Streamline has a 20 year proven track record and processes millions of payments every day: securely and quickly, so you get a great rate and a reliable service.

## Consolis Payments, the complete payment solution from the experts in integrated systems

From integrating a state of the art payment terminal with a sophisticated EPOS till system, to a simple standalone counter top card machine, Consolis Payments are specialists in understanding how credit and debit card machines can work together with EPOS and cash registers.

Integrated Chip and PIN gives your customers a faster, more efficient service enabling you to take more money and giving you better control of your business finances. An integrated solution resolves the issues of error caused by double entry, eases reconciliation, reduces time at the till and mounting queues.

### About Consolis Payments

Consolis Payments is part of the Consolis Group which consists of:

**CES Software** - an established specialist in writing and developing EPOS software used in tens of thousands of retail stores and hospitality outlets across the UK and internationally

**Octepos** - a company which has led the way in integrating EPOS systems with payment processing and other added value services.

Consolis Group companies have been providing world class products and services to tens of thousands of

customers in the cash register and EPOS markets for over 20 years.

Consolis Payments aims to provide the same best in class service to its customers whether they are using stand alone or integrated payment devices to process payment transactions safely and securely.

Consolis Payments is ideally placed to understand your payment needs, from taking a few coins to state of the art mobile phone contactless payments.
